

These can also be made with a horizontal arm which will make it easy to rest a drink on it and could also have a wider timber topped arm attached. The pad is replaceable over time so that the chairs can remain in good repair

The benefit is a comfortable and relaxed chair without having to lean to put drinks on the table all the time.

The entire seat cushion sections can be replaced as required to keep them looking good for years and this together with the metal frame will give Defence a really long life on this product.
